Dear colleagues and friends!

Belarus is an open economy country exporting a significant part of its total output. Leadership, innovative approach, introduction of high-tech processes serve as the driving force for the Belarusian companies that, despite the difficult situation on foreign markets, manage to dynamically and systematically conquer new export niches year after year as well as to solidify positions in their traditional end markets.

National economic policy is aimed at creating favorable business environment so that to disclose export potential of Belarusian companies. In recent years, we have achieved considerable success in this regard. It has been proved by international expert

research indicators in the field of entrepreneurship. Belarus is one of the leading business reformers. For the third year in a row we are among the top 30 international trade leaders, being ahead of our EEU partners and a number of EU countries. According to experts, we are annually narrowing the gap between the current achievements and the so-called advanced frontier calculated on the basis of the best indicators and practices in the field of business regulation among 190 countries for all years of research.

National export development is one of the main priorities of the 2020 Strategic Development Plan of the Belarusian Chamber of Commerce and Industry. Belarusian

Exporters catalogue has become the major information tool on the way towards this goal. And you are now holding the sixth edition of this publication. The catalogue contains most relevant data about more than 2000 leading Belarusian producers whose products and services are widely known abroad. The pages that follow contain information about large enterprises and holdings that have come into the spotlight in various parts of the world, as well as medium and small businesses that are just beginning to enter international markets.

I am confident that this new edition of Belarusian Exporters, like the previous ones, will become a demanded and

convenient guide to Belarusian exports, and will open new avenues and opportunities to implement successful joint projects.

On my own behalf I would like to assure you that the Belarusian Chamber of Commerce and Industry will always be at the forefront of cooperation development between domestic and foreign companies. Let me wish you every success in all of your constructive endeavors!

Vladimir Ulakhovich
Chairman of the Belarusian Chamber
of Commerce and Industry

BELARUS. GENERAL INFORMATION

GEOGRAPHY

The Republic of Belarus is situated in the heart of Europe, at the crossroads of trade routes from west to east and from north to south. It is crossed by the shortest transportation routes linking the CIS countries with the countries of Western Europe. Belarus is bordered by Lithuania and Latvia in the north, Ukraine in the south, Russia in the east, and Poland in the west. Minsk is located 500 km away from Warsaw, 700 km away from Moscow, 1060 km away from Berlin.

Belarus covers the total area of 207,600 sq. km. Its extension from north to south is 560 km (350 miles) and from west to east is 650 km (460 miles). It is larger than Austria, Greece, Ireland, and Portugal. The country's capital – Minsk – is on the same latitude as Hamburg and Dublin. Belarus' highest point – Dzerzhinsky Hill (345 m above sea level) – is in the Minsk Region. The country's lowest point is the Neman Valley in the Grodno Region (80–90 m above sea level). The territory is divided into six administrative regions.

CLIMATE

Belarus has moderate continental climate featuring mild winters with frequent thaws and rainy warm summers. Average temperatures vary across Belarus. In January, temperatures average from -4.5°C to -8°C . In July, the average temperature is $+17^{\circ}\text{C}$ to $+18.5^{\circ}\text{C}$. The average annual rainfall is 600–700 mm.

POPULATION

The population of the Republic of Belarus is about 9.5 million people. Belarus is a multinational country with 70 percent of urban population.

LANGUAGE

Belarusian and Russian are the official state languages in Belarus. The most common languages for business communication with foreign partners are English and German.

PUBLIC, REPUBLICAN AND OTHER HOLIDAYS

The following public and main republican holidays are celebrated in Belarus (the holidays marked bold are officially non-working days in Belarus).

Public holidays:

- Constitution Day – 15 March;
- Day of Unity of the Peoples of Belarus and Russia – 2 April;
- **Victory Day – 9 May;**
- Day of the State Coat of Arms and Flag – second Sunday of May;
- **Independence Day (Republic Day) – 3 July.**

Republican holidays:

- **New Year – 1 January;**
- Day of the Defender of the Fatherland and the Armed Forces of the Republic of Belarus – 23 February;
- **Women's Day – 8 March;**
- **Labor Day – 1 May;**

- **October Revolution Day – 7 November.**

Religious holidays:

- **Orthodox Christmas – 7 January;**
- Easter – by the Orthodox and Catholic calendars;
- **Radunitsa – by the Orthodox calendar;**
- Memorial Day – 2 November;
- **Catholic Christmas – 25 December.**

If any official public holiday falls on a weekend, usually no extra day of rest is provided. If any of the abovementioned holidays falls on Tuesday or Thursday, the preceding Monday or the following Friday (respectively) is as a rule an official non-working day, while the Saturday nearest to the holiday is a working day.

Foreign organizations in Belarus, such as embassies and consulates, usually celebrate the public holidays of their countries in addition to the Belarusian public holidays.

BELARUS. FOREIGN TRADE

FOREIGN TRADE IN GOODS

The structure of the industrial complex identifies a high degree of openness of the economy of the Republic of Belarus and its focus on foreign markets. More than 50 percent of the goods produced in the country are exported.

Over the last decade, the foreign trade dynamics of the Republic of Belarus has been characterized by rapid increase in goods and services turnover volume. It is determined by high rates of economic growth, increase in scientific and technical, transit potential, participation in integration processes within the CIS, as well as diversification of trade and economic relations with other regions worldwide. Major events that significantly influence the conditions of export activities are the membership of Belarus in the Eurasian Economic Union with Armenia, Kazakhstan, Kyrgyzstan and Russia, the build-up of a unified economic zone and forthcoming accession to the WTO.

The country produces a wide range of high-tech products with stable demand in foreign markets: agricultural machinery, buses and trams, road-building machinery, technical equipment, gas cookers, washing machines, microelectronics products, and optical devices.

Export products of Belarus are diverse and include more than 1000 articles. Among the major export commodities of Belarus are potash and nitrogen fertilizers, oil products, rolled steel, metal cord, trucks, tractors, chemical fibers and yarns, caprolactam, tires, furniture, refrigerators and freezers, wood products, clothing, shoes, dairy and meat products, sugar.

8 CORE BELARUSIAN PRODUCTS:

- cargo vehicles, road and construction machinery;
- tractors and agricultural machinery;
- refrigerators and household appliances;
- fertilizers;

- flax fibers;
- chemical fibers and yarns;
- meat products;
- dairy products.

FOREIGN TRADE IN SERVICES

Transport services make 50 percent of the total Belarusian services export volume, which is determined by favorable geographical position of the Republic of Belarus. IT and construction services are also among chief exports.

Belarus' imports are mainly made up of energy resources (oil and natural gas), raw materials, materials and components (metals and metal products, feed to chemical plants, machine parts), manufacturing equipment.

Belarus has trade relations with more than 180 countries around the world.

Russian Federation is the major trade partner of the Republic of Belarus. It accounts for about 45 percent of Belarusian exports and more than a half of its imports.

The European Union is the second largest trade partner of the Republic of Belarus, it accounts for 26 percent of exports and one fifth of imports. The main importers from Belarus in the EU are Great Britain, Germany, Poland, the Netherlands, Lithuania, Latvia, Belgium, Italy, the Czech Republic.

Among the CIS countries, Ukraine is ranked second after Russia; Kazakhstan is the third.

There is a positive dynamics in cooperation with the traditional partners in Latin America such as Argentina, Brazil, Ecuador, Venezuela, and in Asia, notably with Azerbaijan, China, India, Iran, Israel, the UAE.

EDUCATIONAL AND CONSULTING UNITARY ENTERPRISE OF THE BELARUSIAN CHAMBER OF COMMERCE AND INDUSTRY 'BUSINESS TRAINING CENTER'

Educational and Consulting Unitary Enterprise 'Business Training Center' enjoys many years of experience in the sphere of organization of educational programmes, seminars, trainings, roundtable discussions.

THE CORE AREAS OF THE EDUCATIONAL PROGRAMMES ARE:

- foreign economic activities;
- management;
- marketing and advertising;
- logistics;
- finance, investment planning;
- foreign economic activities;
- customs regulation;
- business law, civil and labor law;
- ecology;

- assessment of intellectual property, property, land and business, etc.

The lectures are delivered by the leading representatives of the business community, state authorities, academic staff, operating in the areas of the audience's interest. The Business Training Center provides students with practical consultations on the lecture material followed by a productive dialogue.

One of the principal areas of the Center's activities is the organization of short-term educational and business programmes abroad. Exposure visits to leading foreign companies within innovative business tours, presentations of technological processes, establishment of direct business contacts with foreign partners help Belarusian companies get new experience in their sphere, strengthen their economic ties and gain access to foreign markets.

INTERNATIONAL ARBITRATION COURT AT THE BELCCI

International Arbitration Court at the BelCCI (IAC at the BelCCI) is a standing non-governmental, non-profit organization, operating on a remuneration basis.

Granting there is an agreement between the parties (arbitration agreement), the following categories of disputes can be submitted to the IAC at the BelCCI:

- disputes between any subjects of law, arising in the course of foreign trade and other forms of international economic relations if the location or place of residence of at least one of them is abroad;
- disputes of legal entities of the Republic of Belarus with other legal entities of the Republic of Belarus and individual entrepreneurs of the Republic of Belarus;
- other internal economic disputes, arising between the entities of the Republic of Belarus, unless it is forbidden by the law;

- disputes between foreign legal entities and individual entrepreneurs located outside the Republic of Belarus.

The obvious advantages of the arbitral procedure include the opportunity to participate in the formation of the court by assigning the size of the court and appointing certain persons as main and reserved arbitrators, the choice of applicable law and the language of the arbitration proceeding, the order of proceedings, the possibility of case hearing under the simplified procedure, the confidentiality of case hearing, the finality of the awards delivered by the IAC at the BelCCI, and the possibility to enforce the arbitration awards in any of the 157 countries – members of the UNO Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958).

РАДИОВОЛНА

ОТКРЫТОЕ АКЦИОНЕРНОЕ ОБЩЕСТВО

OJSC "Radiovolna" is a multi-profile industrial enterprise, operating in the field of mechanical engineering for more than 40 years. The enterprise specializes in the production of power generating units and spare parts to tractor machinery.

Main types of production and services:

- mechanical processing, mechanical assembly production;
- press forging production;
- non-ferrous castings production;
- production of galvanizing and paint-and-varnish coatings;
- tool-making;
- production of plastic and rubber components;
- stainless steel pipes bending and welding;
- rental of vacant spaces.

Engineering and production of special vehicles (vans and special machinery 'Lubava').

Lubava
www.lubava.by

LLC "SPC Engineering Auto"
the Belarusian producer of truck vans and special machinery "Lubava"

The major field of our company's activities is the design and production of various-purpose truck vans and special-purpose transport vehicles.
At the moment, our company can produce the following types of truck vans:

- refrigerator vans
- workshop units
- watch vans
- commercial vans for itinerant trade
- vans for consumer goods
- vans for bakery products transportation
- trailer vans for living
- vehicles for difference services (Ministry of Internal Affairs, Ministry of Emergency Situations, Ministry of Defense, etc.)

The production of non-standard vans according to your technical design specification is possible.

ALUMINUM HEAT-EXCHANGE UNITS "TASPO" WWW.TASPO.BY

The company "TASPO" develops and produces aluminum radiators with varying functionality. The radiators are produced basing on the own technology patented in the Republic of Belarus and the Russian Federation.

The key types of TASPO heat-exchange units include:

- radiators for cooling system of internal combustion engines;
- oil radiators;
- charge air coolers;
- diesel driven generator and compression unit coolers;
- calorifiers for ventilation systems and drying cabinets;
- heat-exchange units for air curtains and fan coil units;
- heat-exchange units for air cooling in air conditioning systems;
- heating systems radiators (cabin and car salon heaters).

Our partners are leading enterprises of Belarus and Russia. They include Minsk Wheel Tractor Plant, Minsk Automobile Plant, Minsk Tractor Works, Minsk Motor Plant, BelAZ, bus-producing enterprises "AMAZ", "LIAZ", "PAZ" and "Volozhanin", etc. The company boasts long-term experience in cooperation with companies from Germany, Italy, France.

Production of articles by welding, powder coating, polymeric materials extrusion, packaging of metalware, assembly of any complexity articles.

State Enterprise Konus

of the Republican Unitary Enterprise Scientific and Practical Center
of the National Academy of Sciences of Belarus for Agricultural Mechanization

Hot-Dip Galvanizing Plant Konus provides anticorrosive treatment of steel structures, large-size steel constructions, cable-support systems and light-gauge sheet metal items by means of hot galvanizing for customers in Belarus, Russia, CIS countries and neighboring countries.

The modern Italian automated line and one of the largest in Europe hot-dip galvanizing kettles make it possible to perform hot-dip galvanizing of steel structures with

maximum dimensions 14,5x1,6x3,2 m (length x width x height) and weighing up to 6 tons. Zinc coating thickness ranges from 40 to 200 microns in accordance with the standard GOST 9.307-89 and STB ISO 1461-2009, depending on steel grade and article size. The company operates in accordance with Quality Management System STB ISO 9001-2009.

LLC "Plant Prommehanika"

www.millcnc.com

LLC "Plant Prommehanika" is a mechanical engineering enterprise specializing in the single-unit, small-batch and serial production of industrial equipment, mechanisms, units and separate parts. The enterprise enjoys a full closed production circle: from project desing solution to ready-made production. The highest accuracy of metal processing is ensured by a large stock of hi-tech unique equipment (more than 100 units), that enables mechanical processing and the producing the high-quality goods within the shortest time period possible.

The samples of the works performed are available on the internet at the following link: <http://millcnc.com/ru/galereya-rabot/category/2.html>.

The advertisement for MIDIVISANA features a logo at the top with a green and gold emblem and the company name in green. Below the logo, a white aircraft is shown in flight against a blue sky. The main text describes the company's development and production of mobile complexes and systems. A list of services is provided, including control and communication stations, mobile navigation-topographic systems, logistics and medical support, emergency management centers, short and medium range unmanned aircraft systems, and other multifunctional modular products. At the bottom, a military vehicle with a yellow and black camouflage pattern is shown. Contact information for MIDIVISANA, LLC is provided at the bottom left of the advertisement.

MIDIVISANA
Development and production of mobile complexes and systems on the basis of constant and variable volume van bodies, including:

- control and communication stations;
- mobile navigation-topographic, navigation-geodetic and printing complexes;
- logistics and medical support systems;
- emergency management centers;
- short and medium range unmanned aircraft systems;
- other multifunctional modular products for civil and military use.

Development and production of refrigeration units, chillers, ammonia refrigeration units, control cabinets, pump blocks, air conditioners for transport vehicles, car refrigerating units.

RefUnits JV is a leading manufacturer of refrigerating equipment sets in Belarus:

Development and production of refrigerating units, chillers, ammonia refrigerating plants, control cabinets, pumping blocks, vehicle air conditioners, automobile refrigerating units.

High quality of development and production!
Certified in conformity with ISO 9001:2008 Quality Management System.

RefUnits provides simple and reliable solution for the creation of cold anywhere in the world!

LLC "Rudgormash" manufactures mining equipment. The enterprise has a license of the State Supervision Service of the Ministry of Emergency Situations of the Republic of Belarus on designing, developing, manufacture, installation, adjusting, maintenance operation, preliminary treatment and repair of technical devices used in hazardous industry projects.

The list of manufactured products includes:

- Mine shuttle cars
- Bins/overloaders
- Mine cargo lorries
- Explosion-proof unit transformer substations
- Explosion-proof asynchronous motors
- Self-closing mine doors
- Multipurpose conveying/crushing units
- Travelling scraper loaders
- Explosion-proof magnetic control stations
- Explosion-proof magnetic control boards

The enterprise manufactures the products that provide our clients and partners with high productivity, guaranteed fault-free operation, as well as competitive advantages.

Production of technological equipment and appliances for public catering enterprises, trading enterprises.

JLLC S-TANK is a joint venture employing European capital and technologies. The main activity of the company is the production of heat storing tanks to be used in heating and domestic hot water (DHW) systems, as well as enamel and stainless steel boilers.

Currently, the production range includes tanks from 100 up to 5000 liters. The item list also includes tanks with one or two coils made of carbon or stainless steel. We can also offer tanks to be used as a part of solar collectors, gas boilers, solid fuel boilers, heat pumps, chillers, recovery systems, water treatment systems, and much more.

We are especially proud of the SS series tanks made entirely of high-quality stainless steel of AISI 304 model, commonly used in medicine and food industry. The advantage of such tanks is compliance with the highest requirements of environmental standards for the quality of the water used for food purposes, as well as their durability, as contrasted with the enameled hot water tanks.

**SUBMERSIBLE
DOWNHOLE ELECTRIC
PUMP UNITS
ECV AND SPA**

- New generation pump units with improved head-capacity and power characteristics
- Body parts of the pump unit are made from stainless steel or cast iron
- Working tools may be made from stainless steel, cast iron, reinforced plastic – NORYL
- Manufacture of the pump units that can be used with chemically active water (including sea water), with high mineralization level and temperature

**EQUIPMENT
for well construction and
wellhead infrastructure
development**

- Production of pump and pump stations control and safety systems (IP 41, 54, 65)
- Production of drilling tools and equipment (clay mixers, vibration machines, drill keys, hydraulic under-reamers, etc.)
- Production of equipment for wellhead infrastructure development (filters, columns, headwall, etc.)
- Production and supply of pump installation and operation equipment

**HIGH-PRESSURE PUMPS
AND STATIONS****Range of use:**

- water-supply systems;
- washing and clean-up systems;
- ultra filtration systems;
- reverse osmosis systems

Peculiarities and advantages:

- reliability;
- energy-efficient performance;
- ease of technical maintenance;
- compact size;
- ability to create high pressure

OJSC "Polesyelektromash" is one of the largest manufacturers of all-purpose asynchronous electric motors. Since 2012, the enterprise is a member of the "Belarusian Metallurgical Holding". The following types of products are produced by the enterprise:

- asynchronous three-phase electric motors;
- asynchronous single-phase electric motors;
- special-purpose electric motors;
- explosion-proof electric motors;
- energy efficient electric motors for general use;
- electric motors for electric railway switchgears;
- centrifugal electropumps for household use;
- centrifugal submersible electropumps for contaminated water.

The company has developed and implemented the quality management system for compliance with the requirements of the international standard ISO 9001.

We guarantee quality, reliability, safety!

Nodvig Plant,

Joint Limited Liability Company

211400, Vitebsk region, Polotsk, Komarova St., 17

Since 1993, a Belarusian manufacturer of winding products has been developing and producing:

- transformers with capacity up to 9 kVA;
- three-phase transformers with capacity up to 27 kVA;
- autotransformers with capacity up to 35 kVA (including for step-voltage regulators with stabilization accuracy up to 1%);
- measuring current transformers with nominal voltage up to 0.66 kV and 0.2S/0.5S accuracy class (through-type, bus-type and support-type);
- high-voltage ignition transformers and transformers for neon signs;
- matching and output transformers;
- high-voltage and impulse transformers;
- toroidal and rectangular cores;
- inductance coils and throttles.

BUSINESS PROFILE:

development and manufacture of integrated microcircuits, semiconductors, LCD, electronic and medical equipment items.

COMMERCIALLY AVAILABLE:

more than 2200 types of integrated circuits;
more than 800 types of semiconductor products;
more than 200 LCD indicators and modules;
single-crystal silicon plates with the diameter of 100, 150, 200 mm;
electronic and medical equipment items.

The enterprise provides **SERVICES** for the design and production of integrated microcircuits and semiconductor products (foundry business).

CJSC Mechatronics

TELEMATICS EQUIPMENT FOR vehicles and special machinery.

MECHATRONICS

smart & simple telematics

JSC Mechatronics develops and manufactures innovative solutions in the field of automotive telematics and mechatronics. With our solutions you can carry out:

- High-precision tank fuel level control
- Level monitoring of aggressive, explosive and food liquids
- Level monitoring of liquid gas (LPG)
- Fuel consumption control, instantaneous fuel consumption control, control of engine operation and overload time
- Continuous axle weight control

Eurosens Dominator fuel level sensor

Modular design. Easy to install. Easy to service. Robust construction. Automotive connectors. Over-voltage protection. Compatible with all AVL trackers. Thermal stability. Versions with display. Big and small head versions. 5 years warranty.

Eurosens Dominator

Eurosens Delta & Direct fuel flow meters

Perfect device for fuel consumption control in diesel engines. Reasonable price. High precision measurement. Easy to install.

Eurosens Delta

Onboard weighing systems
Are used for onboard axle load and cargo weight monitoring of the trucks and trailers with leaf-spring and pneumatic suspension. Can handle and process information from several Eurosens Difference sensors.

Eurosens Difference

COMPREHENSIVE SOLUTIONS

TELECOMMUNICATIONS, SAFETY,
ENERGY ENGINEERING

OJSC "SVYAZINVEST" is one of the largest developers, producers and integrators of a wide range of products and services for various purposes, having more than 20 years' working experience. The company staff includes more than 300 highly-qualified specialists; there are affiliate companies both in the Republic of Belarus and abroad. The activity structure includes all the competence centers necessary for a full-cycle project implementation: developers, production facilities, logistics, engineering, design engineers, engineering teams for commissioning and start-up, technical maintenance center, etc.

WIRELESS BROADBAND ACCESS EQUIPMENT

Nowadays, professional systems of wireless broadband access with optimal price/quality/reliability ratio are increasingly being used for joining of distant objects to local networks or to the Internet.

InfliMAN 2x2 is an optimal solution for the enterprises requiring high throughput capacity (up to 240 Mbit/sec per sector), safety and the possibility to control the quality of service (QoS). The system supports a wide functional set and frequency coverage, which allows routing the networks with advantageous price/productivity ratio.

InfliLINK XG is an innovative solution for point-to-point connection. Due to the unrivaled spectral efficiency, the system has the throughput capacity up to 500 Mbit/sec with the band of 40 MHz and over 130 Mbit/sec at the band of 10MHz. For less exigent projects, there are InfliLINK 2x2 LITE and InfliLINK 2x2 PRO devices that have throughput capacity up to 180 Mbit/sec and 280 Mbit/sec respectively.

e-mail: zebt@horizont.by

"Horizont factory of Electronics and Household Appliances" Production Unitary Enterprise was founded in 2008, within the HORIZONT Holding Company. Today the enterprise is one of the largest producers of Household appliances and electronics among the CIS. The considerable production experience of the company, multiplied by more than half a century of quality traditions, allows the enterprise to follow the modern trends of the electronics world.

Horizont 55LE7161D

Horizont 49LE7162D

Horizont 65LE7173D

Currently, the company produces a wide range of LCD TVs ranging from 22 to 65 inches with a wide range of technical and user functions that meet current trends of the television market. A series of HORIZONT TVs with the function of SMART TV powered by ANDROID operating system is very popular among consumers.

One of the main missions of the company is to improve the living standards of its customers, therefore the **"Horizont factory of Electronics and Household Appliances" Unitary Enterprise** produces split-system air conditioners that bring comfort and warmth.

Taking into consideration the fact that modern technologies are moving towards interactivity development and interaction with the user, **"Horizont factory of Electronics and Household Appliances" Unitary Enterprise** has mastered the production of interactive sensor-based systems that will be widely used in such spheres of life as education, business, health, culture, etc.

Production of eco-friendly paints and lacquers.

AVN Company is a modern enterprise, specializing in the production of waterproof furniture for bathrooms and toilet seat covers.

The bathroom furniture production process includes design of new models, mechanical handling of particle-board, MDF and solid wood items, assembling, manufacturing of both film and painted facades. The production of toilet seat covers bases on the Duroplast rigid plastic processing through direct compression.

The full production cycle equipped by advanced technologies and latest Italian and German equipment allows the company's setting reasonable prices while enabling quality control at all production stages.

The whole range of our products is covered by a 24-months warranty.

**We manufacture our products
for your pleasure and for years to come.

OJSC "Makrodor"

Selitskogo St., 19, Minsk, Republic of Belarus

Phone (sales and marketing department):

+375 17 299-66-84, +375 17 345-50-91, +375 44 712-04-65

E-mail: makrodor@tut.by

Web: www.makrodor.by

Makrodor OJSC is one of the leading manufacturers of hot-mixed asphalt, mod-bit, special asphalt cold mixes and deicing agents in the Republic of Belarus.

The enterprise enjoys more than seventy years of successful work. Being active in improvement and constantly updating the production base, the enterprise can satisfy all the customers' needs in high-quality products manufactured on the most modern equipment of German and Austrian produces.

While hot-mixed asphalt due to its quick "bondability" can be applied only at a relatively small distance from their production site, cold asphalt with the shelf life ranging from six months to one year can be delivered to consumers in virtually any region of the world without significant restrictions on the delivery time and subsequent use.

Offering favorable conditions, Makrodor OJSC is interested in supplying high-quality cold asphalt in a convenient for the customer packaging (20, 500 kg, etc.) to the CIS and far abroad countries.

By purchasing cold asphalt of Makrodor OJSC production, which is produced with the use of one of the world best modifying additives, you get a number of significant advantages:

- easy laying without the use of additional equipment;
- possibility to make pothole repair of streets, sidewalks and building surrounding grounds in any weather conditions;
- ease of transportation and storage.

**Makrodor OJSC guarantees
the highest quality of the products.**

STiM Company has been manufacturing road marking machinery and materials for more than 19 years. We produce virtually the whole range of road-marking machinery using advanced technologies and component parts from world leading manufacturers.

Today, the STiM Group of Companies includes a number of enterprises engaged in road building and civil engineering.

We manufacture all kinds of road marking materials: paints, thermoplastic, cold plastic. The materials produced at our enterprise are tested in own accredited laboratory and have the certificate of compliance, own manufacture certificates, ISO 9001 certificate.

One of our company's major activities is cooperation with the CIS states' road building enterprises, including the research activities and introduction of new technologies into the production of road marking machinery and materials, bitumen concrete, special-purpose road building machinery (roadside pavers, pothole filling machinery, concrete-spreading machines, asphalt mixing plants).

Avgust-Bel CJSC

Avgust-Bel CJSC is the most modern enterprise manufacturing chemical crop protection products in the Republic of Belarus. With first plant launched in 2009, today the factory is among the largest in C.I.S. pesticide industry.

The factory is a modern high-tech enterprise producing environmentally friendly liquid herbicides, fungicides, seed disinfectants and insecticides. Today, it manufactures over 30 pesticides necessary for Belarusian agriculture.

Estimated capacity of the production facility is about 12,000 tons of products per year. These products are primarily intended to satisfy the needs of domestic agricultural market of Belarus. The products are also supplied to the markets of Russia, Ukraine, Moldova, Armenia, Kazakhstan, as well as to far abroad countries (Latin America and North Africa). Future plans include further export geography expansion. In 2015 the enterprise produced 6.3 tons of goods, and export rate reached 66%.

The production complex of the factory incorporates the most advanced technologies. The enterprise uses high-tech equipment from leading European manufacturers. The factory laboratory, unique to Belarus today, is equipped with best instruments in their class which allow monitoring quality of raw materials and end products and therefore manufacturing high-quality products.

Plastic container production facility is equipped with modern equipment for the production of four-layer co-extruded containers.

Avgust-Bel CJSC has been certified by the National System for Conformity Attestation of the Republic of Belarus against the CTB ISO 9001-2009, CTB 18001-2009 standards.

Within the international certification system the enterprise has certified conformity to the requirements of international standards ISO 9001:2008, OHSAS 18001:2007, ISO 14001:2004.

Open Joint Stock Company "Borisov plastic products plant" has been in operation for many years in the field of plastics processing and the production of household chemical goods, produces a wide and numerous product range.

Goods from plastic:

- consumer goods: garden products, household products, kitchen products, products for bathroom and toilet, sanitary and hygiene products, clothes and footwear care products;
- goods for storage and transportation of liquid products (tanks, barrels, cans);
- polymeric containers for collection of household solid waste with volume from 120 to 700 liters, shower tanks, roadblocks, pallets.

Household chemical goods:

- TM "BONUS" is presented by washing powders, liquid detergents, bleaches, a laundry detergent enhancer and a conditioner-rinser for laundry;
- TM "BERIL" includes cleaning and washing agents for kitchen, houseware, bathroom and toilet, household and office equipment, glass and mirrors, stoves and microwave ovens;
- TM "Veya" combines detergents for kitchen, houseware, bathroom and toilet, glasses and mirrors.

Film and film products:

- agricultural polyethylene film and shrink film (of width up to 6 m);
- multilayer film;
- packaging film, including for food industry;
- mulching film;
- polymer sleeves for storage of rolled grain;
- warning tapes;
- high-density polyethylene (LDPE) bags, low pressure polyethylene (HDPE), t-shirt bags, waste sacks and filler bags with and without color graphics.

Pipes:

- polyethylene pipes and adapter fittings for pipelines transporting water;
- polyethylene pipes and fittings for underground gas distribution systems;
- pipes and fittings made of polypropylene (including metal-polymer) for internal systems of cold, hot water supply and heating;
- pipes and fittings made of polypropylene for internal sewerage systems;
- shell pipes for the production of pre-insulated pipes.

BELITA® ВІТАКС® World of Cosmetics

The enterprises "BELITA" and "VITEX" are the founders and recognized leaders in the cosmetics production of the Republic of Belarus.

The "Belita-Vitex" brand unites about 1500 kinds of cosmetic products, including:

- high-performance cosmetics for hair and skin care;
- professional-use agents for hairdressing, cosmetics and massage salons;
- colour cosmetics;
- products for dental care;
- household goods;
- herbal extracts;
- personal-use cosmetics for hotels;

Success of the enterprises "BELITA" and "VITEX" in the cosmetics market is based on:

- advanced technologies;
- high-quality products;
- innovative developments;
- high-quality raw materials from European producers;
- own distribution network;
- a wide corporate chain.

We have been guessing your wishes and caring for your beauty for more than 25 years already.

F3

is one of the leading furniture producers
in the Republic of Belarus

The range of the products manufactured includes more than fifty items. These are bedroom furniture sets, cabinet furniture sets, furniture for halls, small-size furniture, one-piece furniture, non-serial products made to customer order varying from the simplest bedside table to office furniture. The design peculiarity of the produced furniture consists in the usage of medium-density fiberboard for facade production and decorative surface finishing. Different facing materials are applied for furniture production (simulated wood veneer, natural veneer sheet, film), as well as solid wood.

Slonim furniture is characterized by:

- high quality,
- attractive design,
- comfort,
- modern paint and lacquer materials,
- reasonable price.

THE EMPIRE OF SLEEP AND REST

BAPPO

MATTRESSES • BEDS • BEDDING

www.barro-shop.by

www.barro.ru

Foreign Enterprise "Barro" is a successful modern company. It was established in 1996. The company's main products are spring and springless mattresses, spring boxes "Bonnel" and "Pocketblock", cushioned furniture, accessories for sleep and rest.

The company implemented STB ISO 9001-2000 quality system in 2009. Our goods are manufactured with the most advanced equipment of the world leading manufacturers "SPUHL" (Switzerland), "DUFF", "FIDES" (Italy).

The complete production cycle, that includes its own production of spring boxes, allows the company to react promptly to the changing market tendencies, consider the requests of customers and put them into life.

ИВЕНТА
www.ivena.by

Iventa LLC is a leading Belarusian producer of extra-class 100% open-wool articles. Iventa LLC produces a wide range of articles from natural wool cloth, i.e. pillows, blankets, mattress covers, home footwear, waistcoats, various warming accessories.

Natural wool articles are popular worldwide due to their unique characteristics that are beneficial for the health. Our company cooperates with leading Italian manufacturers and purchases eco-friendly raw materials, constantly enlarging the product range by adding new types of wool and introducing new colours. Our products are designed for the people who prefer eco-friendly and healthy products. Due to the fact that our client list includes the customers with various income levels, we guarantee the optimal price/quality ratio. Nevertheless, all our clients may be sure that they get the highest-quality products in the shortest time.

AGROPRODUCT LLC is one of the largest rape oilseeds processing enterprises in the Republic of Belarus

Agroproduct LLC today is a modern, well-equipped enterprise with an ongoing production circle. The production facilities include fully functioning pre-press, oil extraction units, facility for deep processing of vegetable oils (hydration, refining, whitening, congelation, deodorization), and bottling areas.

The production facilities allow processing 180 thousand tons of oil crops per year. As much as 300 tons of meal and 200 tons of oil (soybean, sunflower, rapeseed) are produced every day.

The enterprise has implemented ISO 9000:2008 quality management system and OHSAS 19001:2007.

«BERESTEYSKI PEKAR»

OPEN JOINT-STOCK COMPANY

Open Joint-Stock Company "Beresteyski Pekar" is one of the leading bakery plants associations in the Republic of Belarus. Founded in 1924, our enterprise has been satisfying the needs of its consumers in fresh bread and full-flavoured pastries for many years now. The company structure includes 7 affiliate enterprises within the whole territory of the Brest region, i.e. Baranovich, Pinsk, Kobrin, Gantsevichi, Luninets, Stolin, David-Gorodok bakery plants. The head office is located in Brest.

These are modern automated enterprises producing bread, pastry products, dried biscuits, pretzels, bread crumbs, biscuits, gingerbreads, cakes, pastries, glibbery, cupcakes, nuts-and-honey bars, sherbet, puff paste, starchy foods and sugar confectioneries, fruit starch drinks, powdered fermented-bread kvass, malt, etc.

The consistent high quality of products is ensured by a broad range of factors: ecologically clean raw materials, great engineering practice of production lines, strict quality control system, high professionalism of the staff and reliable partner ties. Certification against international standards is an independent corroboration of the highest quality. The enterprise has implemented the quality management system in accordance with the STB ISO 9001-2009 standard, the HACCP system.

OJSC "TUROV DAIRY INDUSTRIAL COMPLEX"

OJSC Turov Dairy Industrial Complex is a high-tech enterprise involved in production of semi-hard and soft cheeses employing Italian technology. The company was founded in 2009. Production startup and first shipments of the finished products took place in May 2013.

The technological process employed for producing dairy products at the company is environmentally friendly. Production complies with the requirements and standard of the EU. The Company implemented and operates foodstuff safety management system and quality control system.

The main equipment intended for milk processing is assembled on the basis of solutions of leading European manufacturers. The main advantage is the maximum yield of the finished product and the absence of protein losses during the process, which significantly affects the cost of the product.

The Company is constantly working on development of the formulas in partnership between the equipment providers and under supervision of Italian production engineers. The production assortment is regularly being improved. The company's products are oriented to different consumer segments and are represented on the market under three brands: CookIng, Villmonte and Bonfesto.

In the fourth quarter of 2017 was launched the second production line. The company will be able to produce about 19 thousand tons of cheese per year, in 2020 – up to 30 thousand tons of cheese when running at full capacity.

We supply our cheeses to 10 foreign markets: Russian Federation, Kazakhstan, Kyrgyzstan, Georgia, Azerbaijan, Armenia, Uzbekistan, Turkmenistan, United Arab Emirates, Singapore.

D JSC Agrokombinat Dzerzhinskiy

JSC "Agrokombinat "Dzerzhinskiy"

is one of the largest producers of poultry meat in Belarus. We produce about 20 % of chicken meat in Belarus. It is a wide range of poultry meat products including frozen and chilled whole chicken without giblets and parts of chicken broilers, various kinds of finished and semi-finished products. The closed cycle of production allows to provide the quality control at every stage of production process.

We care about your family health!

LLC "Veles-Meat" (Maladzechna™)

UNP 630551607

Veles-Meat is a contemporary meat processing enterprise in Molodechno. The company was established in 2009 basing on the Molodechno Meat Processing Plant.

Comprehensive modernization and commissioning of modern equipment resulted in the Molodechno Meat Processing Plant (LLC "Veles-Meat") having the production capacity of 900 tons of sausages and meat delicacies, 150 tons of semi-finished products per month. In the first quarter of 2015, a new slaughter and processing facility was put into operation.

The product line of Veles-Meat company under the trademark of "Maladzechna" includes a wide range of cooked smoked, semi-smoked and boiled sausages, raw and smoked sausage products, sausages and wieners, smoked-boiled meat delicacies, raw and smoked meat delicacies, by-products and sowbely products.

LLC "Veles-Meat" also produces cooled and frozen beef and pork, endocrine and enzyme raw materials. Each product is tested in own laboratory. The Molodechno Meat Processing Plant (LLC "Veles-Meat") has a HACCP system for organizing the manufacture of safe products and the certificates of quality and ISO standards compliance.

LLC "Veles-Meat" products are popular both in the domestic market of Belarus and abroad, which is regularly confirmed by victories at international tastings and in food branch contests. Experts recommend, consumers choose the Maladzechna trademark.

Contact us to learn the cooperation terms!

Joint-Stock Company "Mogilev Meat-Packing Plant" enjoys more than a hundred-year history of quality and traditions. Founded in 1905, it has gained the reputation of a reliable partner, producing high-quality healthy food products. Today, our enterprise is one of the five leading meat processing enterprises in the Republic of Belarus. To date, JSC "Mogilev Meat-Packing Plant" produces more than 500 products, including more than 350 sausage products. The monthly output includes more than 1000 tons of sausage products, 200 tons of meat semi-finished products and 2000 tons of meat and by-products, with 1000 tons of beef meat being exported to Russia and Kazakhstan.

Belsolod JSC is one of the largest and most enterprises producing pale malt brewing barley in the CIS and Eastern European states. The malt-house is equipped with contemporary equipment produced by BÜHLER (Switzerland) and meets the most advanced European standards. Malt manufacturing is certified in line with ISO and HACCP quality standards.

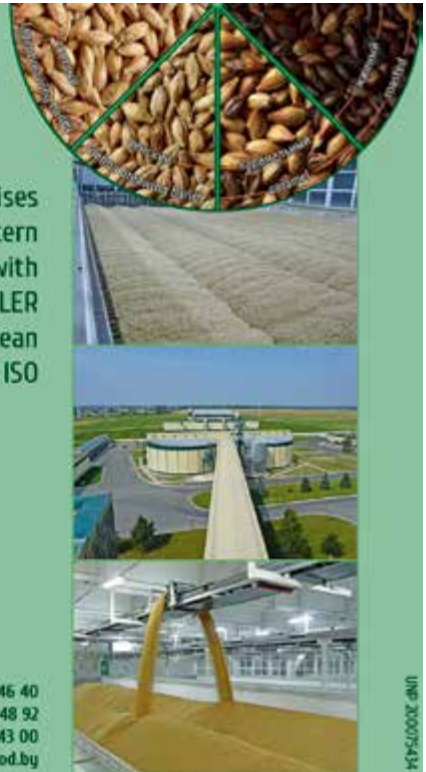

We produce and sell:

- lader brewing barley malt;
- vienna brewing barley malt;
- caramel malt;
- black malt.

Delivery is possible by car and railway transport.

Pchalyski Polachchyny ("the Polotsk Beekeeper") is a company, specializing in the production of expanded polystyrene beehives and trade in beekeeping equipment.

Since 2008, we have been producing hives according to the Polish technologies. First of all, our products are classic professional beehives that possess all the advantages that expanded polystyrene has.

Should you be comfortable with bottom-up adjustable ventilation inside a hive, understand that it's necessary to have entrances in every hive body, know the purpose of a high roof, want to gather pollen in any weather conditions, to use the full range of R&D results in the field of beekeeping and to have a warm and light hive as well - the products of our company is the right choice for you.

Farm Enterprise "Pchalyski Polachchyny", TIN 390522494

LLC "Wigol"

LLC "Wigol" is exclusively presenting the Wigol-Dema-FI-WC-1148ST outer surface (equipment, walls, floor) foam washing system in the Republic of Belarus. The

cutting edge patented joint American-German solution available through "WIGOL*W.Stache GmbH" concern enables impeccable cleaning results at minimum cost. The application of Wigol-FI-WC-1148ST foam generating equipment ensures significant cost savings in various fields of economic and production activities (labour, energy, time coats, washing agents consumption). Foam generators of this type have been installed at many plants in the Republic of Belarus and have demonstrated high reliability and effectiveness.

Vibrobeton,

Additional Liability Company

Dear heads of companies and organizations!

We invite you to become "WinStyle" company clients.

Today, our product range include:

**PVC windows, mosquito nets,
PVC window sills, galvanized steel mouldings.**

Due to our practical expertise, availability of all necessary resources,
as well as due to the constant striving for development, "WinStyle" company provides:

- free specialist on-site visit and preliminary cost calculation;
- cost estimate documentation;
- delivery to the site by our own transport;
- performance of works without subcontracting;
- the quality of all products is confirmed by the certificates STB 1108-98;
- prompt warranty and post-warranty service.

We manufacture both standard-design products
and the products modified according to customer requirements.

Our works meet the highest construction industry requirements
and standards. Our teams are staffed by certified specialists with
a great experience in performing any complexity tasks.

Recently, the high professional level of our company employees
has been highly rated at such sites as: the Belarusian Railway,
the Vitebsk Regional Clinical Oncology Center,
JSC "Display" Design Bureau" etc.
